

**RIDE**

COMPANY OVERVIEW

T-Ride LLC is a full-service rideshare, courier, delivery, and IT solutions firm founded in 2023. Our mission is to connect communities and businesses through technology-driven mobility and secure digital systems.

T-Ride's expertise spans ridesharing, last-mile delivery, courier logistics, and IT consulting across cloud infrastructure, cybersecurity, and custom software development. We leverage AWS Cloud, CrowdStrike Security, and Lansweeper Monitoring to deliver reliable, scalable, and value-driven platforms that improve efficiency and customer satisfaction for both public and private sector clients.

As an Authorized Reseller of Lenovo, HP, and Microsoft products, T-Ride provides end-to-end IT procurement, licensing, and lifecycle support, ensuring clients receive certified hardware and software backed by manufacturer warranties.

T-Ride has successfully developed and deployed five (5) enterprise-grade mobile and web applications integrating real-time tracking, digital payments, and secure user management. These solutions reduce delivery times, lower costs, and improve customer engagement across logistics, rideshare, and government contracting environments.

As a small business, T-Ride is committed to innovation, inclusion, and impactful service delivery that strengthens both community mobility and enterprise digital transformation.
